Defend your entire organisation

In today's digital world, it's crucial to have oversight across your entire digital ecosystem. With **FoxTech Defend**, we can monitor all your servers, workstations, network devices as well as multiple cloud platforms, including **AWS**, **Azure**, and **GCP**, all from a single portal.

We proactively search for threats, Getting started is simple. not waiting for incidents to occur.

FoxTech's cybersecurity team uses advanced analytics to proactively identify and neutralize threats, filtering genuine alerts for quick response.

When incidents occur, we provide rapid response and remediation, including full day 1 incident management for top-priority cases, significantly mitigating business impact.

Protection is near instant.

FoxTech Defend employs a lightweight, multi-platform agent, easily deployed to your chosen endpoints manually or via orchestration tools. It sends data in real-time to our cloud platform through a secure, encrypted, channel. For agent-less devices, we will use Syslog to collect log data.

With our expert guidance, the setup is smooth and protection begins almost instantly.

"FoxTech provide more than a product - they worked with us to significantly improve our security and have become a critical partner"

- CIO, Financial Services

"No more endless false alarms or tedious triage. Now, we receive only crucial alerts, clearly directing us to tasks that demand action"

- Head of IT, Legal

"Choosing FoxTech was a no-brainer. We ditched the clutter of costly, unwieldy tools, streamlining to just FoxTech. Now, our team is free to be more productive, saving us a fortune."

- CTO, IT Management
